PROFILE

Full-stack and AI engineer who takes products from zero to production. Co-founder and lead engineer of **JAMIE** — a social app live on the App Store and Google Play across six European markets with 1,800+ registered users — and **Gastropoly**, a multi-tenant restaurant operations platform with a Claude-powered assistant, in production since July 2026 and in use at three pilot venues. Currently completing an MSc in Artificial Intelligence at JKU Linz with a focus on deep learning and explainable AI. Equally at home in the parts that decide whether a product survives real users: moderation, rate limiting, GDPR flows, tested backups.

EXPERIENCE

Co-Founder & Lead Software Engineer

Gastropoly — Vienna | Jun 2026 – present

- Architected and shipped a multi-tenant SaaS on Next.js 16, React 19, TypeScript, Supabase and Vercel: 158 pages, 63 API routes, 155 database migrations. In use at three pilot venues.
- Built six modules from scratch: shift planning with an offline PIN time-clock kiosk, inventory and supplier ordering, HACCP compliance logging, an accountant cockpit with DATEV export, reporting, and a Claude-powered assistant with a voice mode.
- Integrated ready2order POS, Open-Meteo and AXESS turnstile data into a weather-based demand model that drives both purchase suggestions and shift planning.
- Enforced tenant isolation in the database through Postgres Row Level Security rather than in the application layer; offline-first PWA with a sync queue for unreliable venue Wi-Fi.
- Set the engineering process for a three-person team, with coordinated migration numbering and automated tests gating every merge.

Co-Founder & Lead Developer

JAMIE.groups — Vienna | Mar 2026 – present

- Took the product from zero to both app stores: a React/Vite PWA shipped as a Trusted Web Activity on Android and via Capacitor on iOS, so one deploy updates web and Android at once.
- Built the real-time layer — Socket.IO chat with voice messages, photos, replies, read receipts and reactions — plus a push pipeline on Web Push and APNs.
- Node.js/Express and PostgreSQL on Railway with moderation and reporting, rate limiting, GDPR data export and deletion, and encrypted off-site backups with a rehearsed restore.
- 1,800+ registered users across AT, DE, CH, IT, FR and ES, localised in five languages.

Freelance Web Developer

Therapiezentrum Blumau & others — Austria | 2025 – present

- Responsive, accessible and SEO-optimised websites with online booking for Austrian healthcare practices and small businesses.

Co-Founder & Lead Developer

CollegeRecruit — Waterbury, CT | Feb 2024 – May 2025

- Built and launched a standalone Angular/TypeScript application connecting international student-athletes with US college programs — profiles, college matching, document management and real-time messaging — shipped to the App Store and Google Play.

Data Analytics Intern

eEvolution GmbH — Linz | Jun – Aug 2023

- Built Power BI dashboards on business KPIs for executive decision-making, cleaned and modelled data in Python, and presented findings to stakeholders.

EDUCATION

MSc Artificial Intelligence

Johannes Kepler University (JKU) Linz | Oct 2025 – present

Focus on deep learning, with coursework in explainable AI: saliency maps, LIME and SHAP.

BS Computer Information Systems, summa cum laude

Post University — Waterbury, CT, USA | Graduated May 2025

Concentration in Software Development, minor in Data Analytics. GPA 3.7/4.0, Honors Program. International student-athlete: vice-captain of the NCAA Division II men's tennis team.

High school diploma with honors

Khevenhüller Gymnasium Linz | 2021

Science and mathematics focus. Cambridge Certificate B2 First.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Swift, HTML/CSS

Frontend: React 18/19, Next.js 16, Vite, Angular/Ionic, Tailwind CSS, PWA & service workers

Backend: Node.js/Express, PostgreSQL, Supabase (Row Level Security), Socket.IO, Flask, SQLAlchemy, REST/JWT

Mobile: Capacitor (iOS), Trusted Web Activity (Android), Web Push, APNs, App Store & Play releases

AI & data: LLM integration (Claude), PyTorch, TensorFlow, pandas/NumPy, LIME · SHAP · saliency maps, Power BI

Platform: Vercel, Railway, Stripe, CI/CD, automated testing, Git/PR review, GDPR flows, encrypted backups

LANGUAGES

German (native) · English (fluent) · Austrian Sign Language (native)
